saidshinbas@gmail.com [linkedin](#) [github](#)

PROFILE SUMMARY

Interested in web development technologies, especially the backend part. Loves to follow the developments in the world of technology. Trying to learn cloud technologies like AWS. Cat loves. I love being in nature.

EDUCATION

Yalova University - Turkey, Yalova B.Sc. in Computer Engineering

09/2017 -

SKILLS

- **Programming Languages:** C#, Javascript, Mssql
- **Web Technologies:** HTML, CSS, Bootstrap, Tailwind
- **Frameworks:** Nextjs, Reactjs, .Net Core,
- **Working Architecture:** Layered Architecture, Microservice Architecture

WORKING EXPERIENCE

[Acqwired.co](#) (15.01.2023 - 15.04.2023) (Full-Stack web developer)

Javascript, express, tailwind, nextjs, reactjs, mongodb, git, jira, figma, microservice, jwt, docker

Developed for the frontend part of the website dark mode and light mode feature.

I learned how to create components with reactjs on the frontend and created a few small components. Frontend part improvements according to Figma designs pixel perfect.

I worked with Docker and learned how to read log files from various services on docker and see errors more effectively.

Bug fixing on the frontend side, generally on the input fields.

[Redstar Aviation](#) (21.08.2023 - 18.09.2023) (Software Engineer Intern)

Javascript, Nodejs, express, .Net Core Web API, MongoDB, jwt, Global Exception Handling

I developed a responsive web application at Redstar aviation company using Angular, Nodejs, .Net Core 6.0 and MongoDB. I developed it using Jwt web token. I had the chance to research

and code on many topics such as e-mail validation, regex, Microsoft Identity, Global

Exception Handling, Unit testing, Fluent Validation. I had the chance to criticize and code review the projects I have done with our valuable software architect Uğur Özcan.

PROJECTS

E-Commerce App Clone(Direnc.net)

C#, Visual Studio, Git, Xamarin, Mssql, RestApi ([Github](#))

Developed an Android and IOS application using Xamarin, over 10 screens designed by using XAML.

Implemented MVVM architecture and lifecycle components into the android and IOS application.

Constructed backend system with .Net core 3.0, Mssql, Nginix, Entity Framework, Open API, Auto Mapper.

Food Blog Website

C#, .Net Core 3.1, Javascript, JQuery, Git, MVC, Mssql, Bootstrap ([Github](#))

Developed a modern responsive blog site over 10 pages, login and register pages included.

Working on MVC architecture.

Using Mssql for database and making some crud operations .Managing operations in controller and writing basic queries for showing data in my pages.

Using Bootstrap 5 and implementing free templates for the entire site.
